

libera SUITE

Your documents, on your own machine.

A free and open source desktop office suite for Windows, macOS and Linux. Write, calculate and present on your own computer, with no account and no subscription.

words

tables

slides

TODAY

Writing a report now comes with strings attached

An account

to create before you can type a word

A price to pay

a monthly fee, or your data if it's free

Someone else's cloud

holding your files on their servers

Many people would rather not. What keeps them is simple: everybody sends **.docx**.

LIBERA SUITE

Write, calculate and present

words

Letters, reports, any document

tables

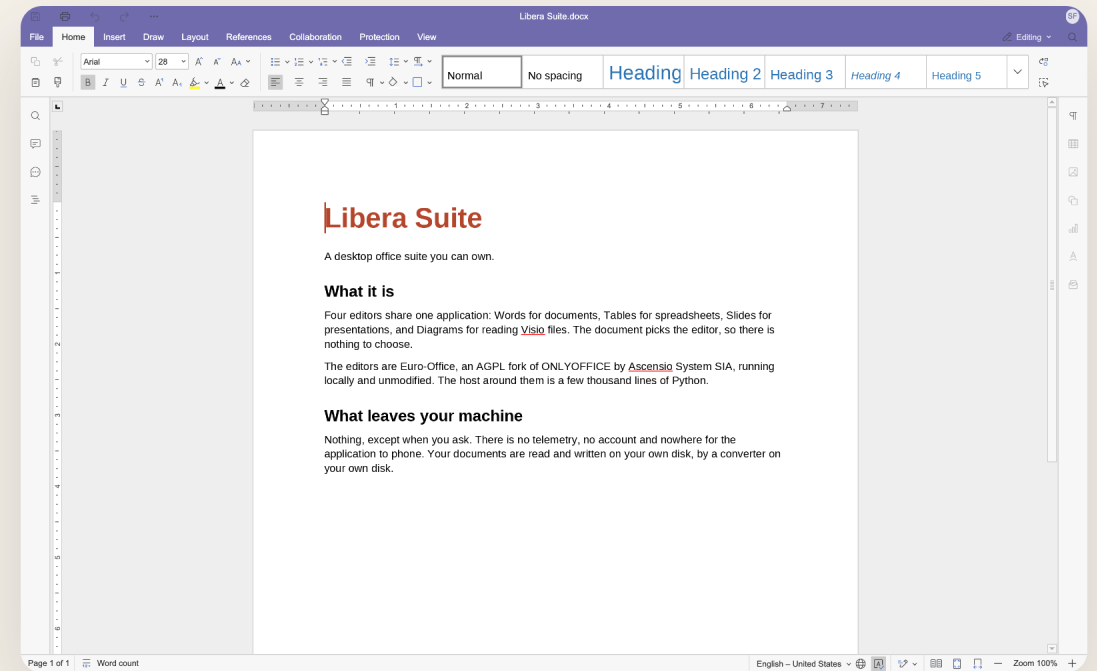

Budgets, lists and figures

slides

Presentations to show and share

And Libera Diagrams, to view Visio drawings.

Spell check in 5 languages

PDF export

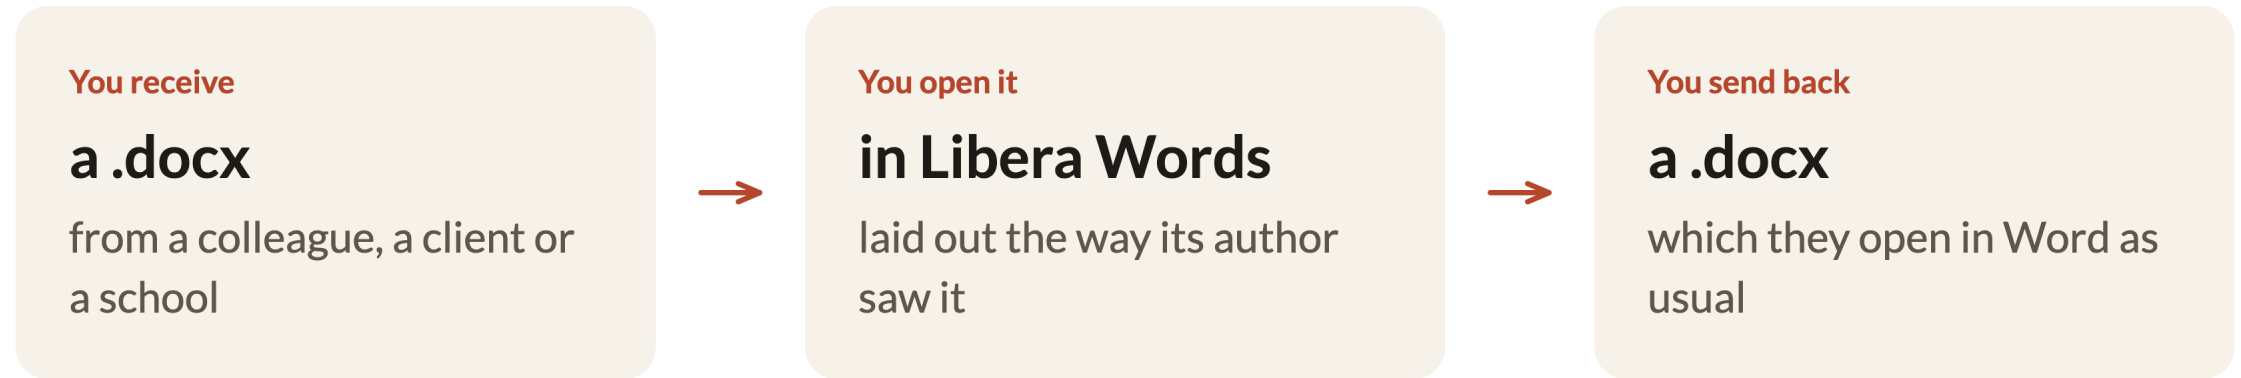

Printing

Recent documents

Your work back after a crash

WORKS WITH EVERYONE

It opens what people send you

Fonts, images, tables and tracked changes come through. Spreadsheets and presentations work the same way.

Microsoft Office

.docx

.xlsx

.pptx

LibreOffice

.odt

.ods

.odp

YOURS

Free, private and yours to keep

Free

No licence fee, no monthly bill. Install it on all your computers.

No account

Nothing to sign up for. Open it and start typing.

Private

No tracking. Your documents stay on your computer, never uploaded.

Yours to keep

Free and open source software, made by Abilian in France.

AVAILABLE NOW

Try the beta today

Windows 10 and 11 · macOS on Apple Silicon · Linux

Download now

More info: docs.liberasuite.eu

It is a beta, and its known gaps are listed openly. The most useful thing you can send us is a document that comes out wrong.
